

**Hi, this is bappa**

**Contact me:**[bappasaha161@gmail.com](mailto:bappasaha161@gmail.com)

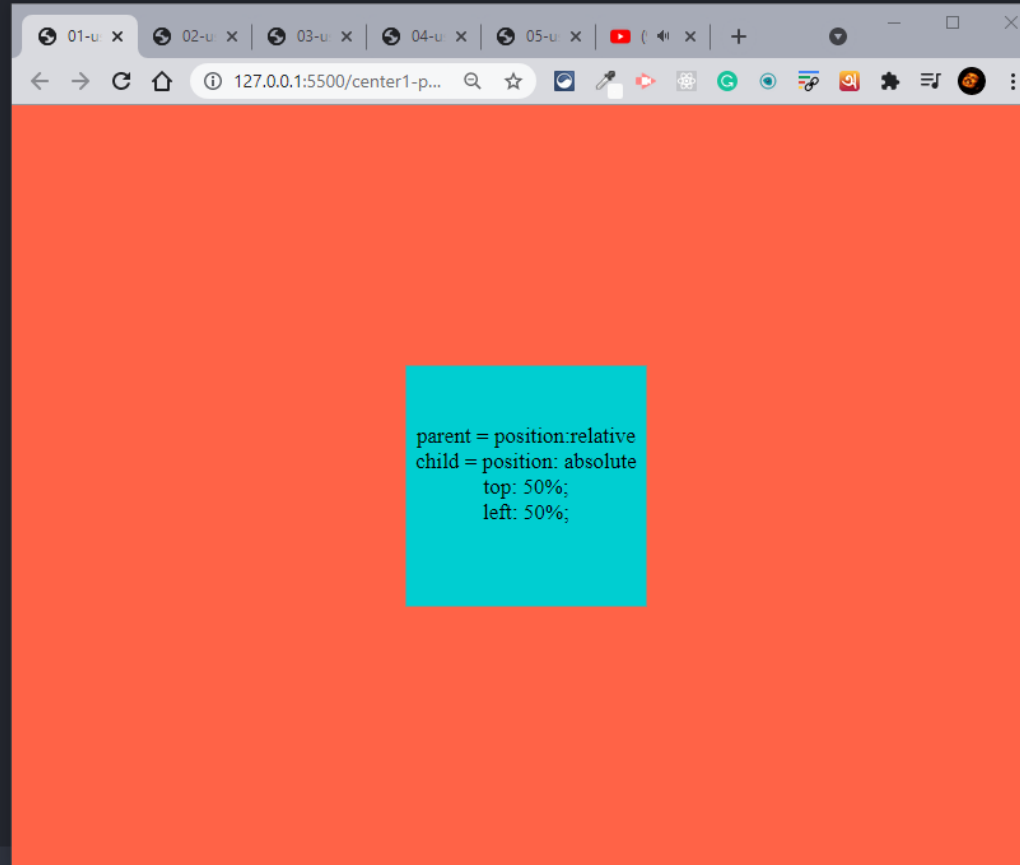

**Here I will show you 5 easy way  
to place anything in center .**

- 1.Using position**
- 2.Using flex-box**
- 3.Using grid-layout**

```

center1-position.html > html > body
8      <style>
9          *{
10             margin: 0;
11             padding: 0;
12             background-color: teal;
13         }
14         section{
15             height: 100vh;
16             position: relative;
17             background-color: tomato;
18         }
19     }
20     .box{
21
22         position: absolute;
23         top: 50%;
24         left: 50%;
25         transform: translate(-50%,-50%);
26
27         /* common to all start */
28         background-color: darkturquoise;
29         height: 200px;
30         width: 200px;
31         text-align: center;
32         font-size: 19px;
33         padding: 5px;
34         /* common to all end */
35     }
36 }
37 </style>
38 </head>
39 <body>
40     <section>
41         <div class="box">
42             <br> <br>
43             parent = position:relative <br>
44             child = position: absolute<br>
45             top: 50%; <br>
46             left: 50%; <br> </div>
47     </section>
48 </body>
49 </html>

```

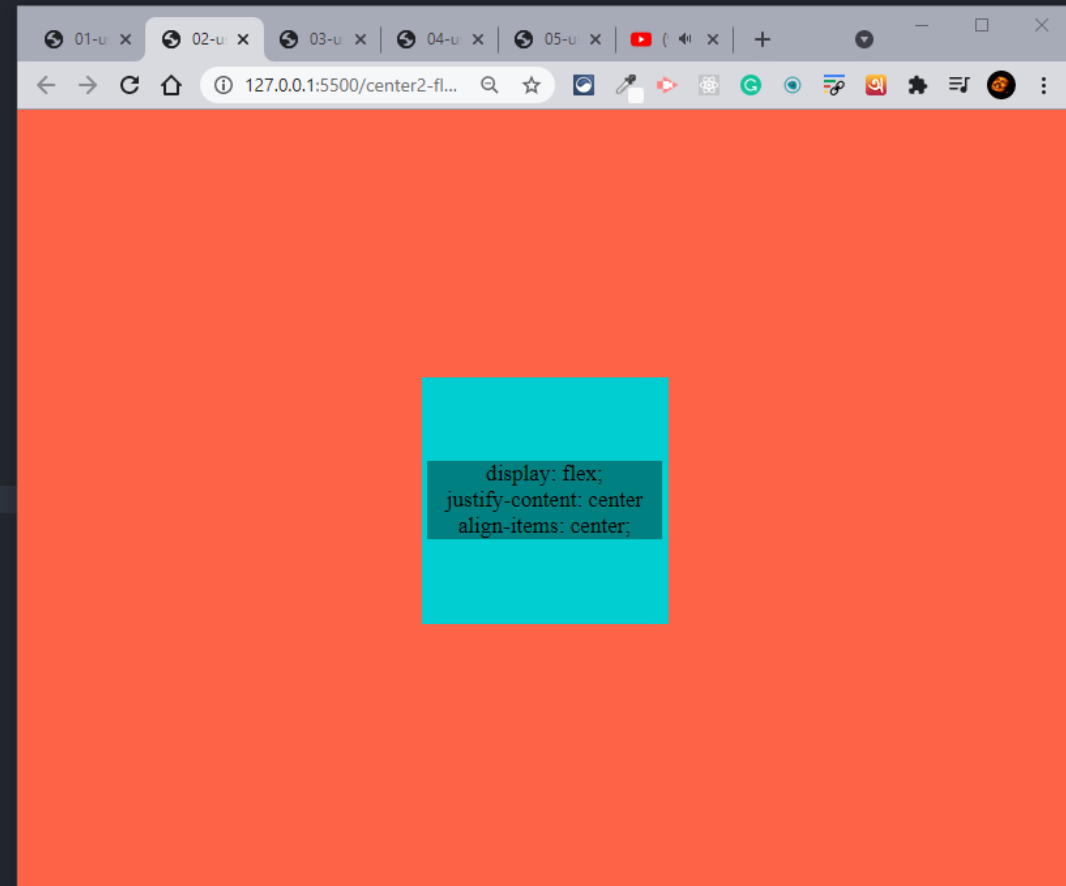

parent = position: relative  
 child = position: absolute  
 top: 50%;  
 left: 50%;

```

center2-flex.html > html > head > style > .box
